

Additional Care Supplement (ACS) - Antenatal

Overview

This training guide will explain how to complete an antenatal ACS claim, as well as show the amounts that are available to claim.

Step by step

First you will need to log into Tiaki. If you don't have a login or you've forgotten your password, please get in touch with MMPO.

1. Select **More**

2. Select **System Claims**

3. Select **Create claim**

4. Select **Claim Type** – Full or Partial (depending on when your care ended)

5. Enter **Date of service** – When your care ended OR the baby's date of birth

6. Select **midwife**

7. Select **Women** – this is person you are wanting to claim for

8. Complete all questions within the form and click/tap **Send claim** once you are happy

NOTE when selecting the woman/pregnant person

★ By default, the "Select Women" field gives you a drop-down list of only the people who are currently in your care.

Click on "Search all woman by Name/NHI" to enable the system-wide search (which will remove this drop-down list and instead look at all the records in BadgerNet).

Your screen should now look like this:

Select women

Enter a name or NHI

Select from carelocation

3. Once you've enabled the system-wide search, please enter her NHI.

Note that when entering her NHI, the message "Loading results (can take up to 10 seconds)" will display. This confirms that you're doing a system-wide search through all records in BadgerNet and not just those that are in your Tiaki.

Antenatal ACS Amounts
